John D. Martin holds the Carr P. Collins Chair in Finance in the Hankamer School of Business at Baylor University, where he teaches in the Baylor EMBA programs and has three times been selected as the outstanding teacher. John joined the Baylor faculty in 1998 after spending 17 years on the faculty of the University of Texas at Austin.

This is the 12th edition of the market-leading Business Finance, a highly regarded text that has now been around for over 40 years. It takes a rigorous and authoritative coverage of major corporate finance topics, sitting at the highest level with regard to technical concepts. It takes a strong analytical approach and is well-suited to strong finance units where students will be continuing on to further studies in corporate finance. The Peirson brand is iconic in this market, with its respected author team including three Professors of Finance. The authors' objective for this update is to ensure that new developments in the field are incorporated whilst retaining the theoretical rigour for which the text is known. The text is suited to rigorous second-year subjects and lower third year subjects, as well as MBA-level finance nonmajors.

The banking industry affects the welfare of every other industry and the economy. Banks are the leaders of the financial-services industry as a whole, however, financial-service competitors are now challenging them more than ever before. Bank Management and Financial Services is designed to help students master established management principles and to confront the perplexing issues of risk, regulation, technology, and competition that bankers and other financial-service managers see as their greatest challenges for the future.

This book presents a humanistic science-based framework for management, promoting an ethical and responsible approach to addressing current global societal problems.

Provides students with an inexpensive note-taking system that contains a reduced copy of every slide in the PowerPoint presentation.

'Developing Management Skills' teaches students the ten essential skills all managers should possess in order to be successful. These skills are grouped into personal skills, interpersonal skills and group skills, so students can see how certain skills are related to others.

For undergraduate Mechanics of Materials courses in Mechanical, Civil, and Aerospace Engineering departments. Hibbeler continues to be the most student friendly text on the market. The new edition offers a new four-color, photorealistic art program to help students better visualize difficult concepts. Hibbeler continues to have over 1/3 more examples than its competitors, Procedures for Analysis problem solving sections, and a simple, concise writing style. Each chapter is organized into well-defined units that offer instructors great flexibility in course emphasis. Hibbeler combines a fluid writing style, cohesive organization, outstanding illustrations, and dynamic use of exercises, examples, and free body diagrams to help prepare tomorrow's engineers.

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. -- The most engaging and musical Sight-Singing text on the market. Music for Sight Singing is structured around organized melodies drawn from the literature of composed music and a wide range of the world's folk music. Real music exercises allow readers to practice sight singing and develop their "mind's ear" -- the ability to imagine how music sounds without first playing it on an instrument. The ninth edition continues to introduce a host of important musical considerations beyond pitch and rhythm-- including dynamics, accents, articulations, slurs, repeat signs, and tempo markings. The book's arrangement of simple to complex exercises lays the foundations for success. Learning Goals Upon completing this book, readers will be able to: Fluently read rhythms in simple and compound meters, including those in relatively unusual, irregular, or changing meter signatures. Sight sing melodies in any major or minor key, and in any diatonic mode. Effortlessly read all four common clefs. Understand common musical symbols and terms. Recognize and sing important harmonic features such as dominant seventh and Neapolitan chords. Improvise effectively from a variety of background structures such as a harmonic progression or an underlying contrapuntal framework. Negotiate chromatic passages from simple embellishing tones and tonicizations to modulations to post-tonal music. NOTE: MySearchLab does not come automatically packaged with this text. To purchase the text with MySearchLab, order the package ISBN: 020595524X / 9780205955244 Music for Sight Singing Plus MySearchLab with eText -- Access Card Package Package consists of: 0205938337 / 9780205938339 Music for Sight Singing 0205955053 / 9780205955053 MySearchLab with Pearson eText -- Valuepack Access Card -- for Music for Sight Singing

For a one-semester undergraduate course in operating systems for computer science, computer engineering, and electrical engineering majors. Winner of the 2009 Textbook Excellence Award from the Text and Academic Authors Association (TAA)! Operating Systems: Internals and Design Principles is a comprehensive and unified introduction to operating systems. By using several innovative tools, Stallings makes it possible to understand critical core concepts that can be fundamentally challenging. The new edition includes the implementation of web based animations to aid visual learners. At key points in the book, students are directed to view an animation and then are provided with assignments to alter the animation input and analyze the results. The concepts are then enhanced and supported by end-of-chapter case studies of UNIX, Linux and Windows Vista. These provide students with a solid understanding of the key mechanisms of modern operating systems and the types of design tradeoffs and decisions involved in OS design. Because they are embedded into the text as end of chapter material, students are able to apply them right at the point of discussion. This approach is equally useful as a basic reference and as an up-to-date survey of the state of the art.
