Listening Spaces in the Twenty-First Century is a multi-authored, collaboratively conceived book of essays that tackles key challenges facing scholars studying music of the United States in the early twenty-first century. This book encourages scholars in music circles and beyond to explore the intersections between social responsibility, community engagement, and academic practices through the simple act of working together. The book's essays—written by a diverse and cross-generational group of scholars, performers, and practitioners—demonstrate how collaboration can harness complementary

The chapters of the volume address issues of race, nationalism, mobility, cultural domination, and identity; as well as the crisis of the Trump era and the political power of music. Each contribution to the volume is written collaboratively by two scholars, bringing together contributors who represent a mix of career stages and positions. Through the practice of and reflection on collaboration, *Sounding Together* breaks out of long-established paradigms of solitude in humanities

Environmental Sound Artists: In Their Own Words is an incisive and imaginative look at the international environmental sound art movement, which emerged in the late 1960s. The term environmental sound art is generally applied to the work of sound artists who incorporate processes in which the artist actively engages with the environment. While the field of environmental sound art is diverse and includes a variety of approaches, the art form diverges from traditional

contemporary music by the conscious and strategic integration of environmental impulses and natural processes. This book presents a current perspective on the environmental sound art movement through a collection of personal writings by important environmental sound artists. Dismayed by the limitations and gradual breakdown of contemporary compositional strategies, environmental sound artists have sought alternate venues, genres, technologies, and delivery methods for their creative expression. Environmental sound art is especially relevant because it addresses

political, social, economic, scientific, and aesthetic issues. As a result, it has attracted the participation of artists internationally. Awareness and concern for the environment has connected and unified artists across the globe and has achieved a solidarity and clarity of purpose that is singularly unique and optimistic. The environmental sound art movement is borderless and thriving.

"Perspectives on a 21st Century Comparative Musicology : Ethnomusicology or Transcultural Musicology? stems from the 'International Seminars in Ethnomusicology' that F. Giannattasio conceived within the activities of the Intercultural Institute for Comparative Music Studies of the Fondazione Giorgio Cini, devoted to a wide reflection on aims, methods and objects of study of ethnomusicology in the light of the profound changes occurring in this field at the beginning of the 21st Century. It concerns a

radical rethinking – at a theoretical and epistemological level – of the history of the discipline, due to the contemporary profound transformation of the object of study. The volume has the ambition of offering new views on what a comparative musicology could do in its enquiry into contemporary music making processes. Scholars coming from different parts of the world, and from different fields of study such as W. Welsch, L.-Ch. Koch, T. Rice, S. Feld, J. Guilbault, J-L. Amselle, contributed to the volume presenting theoretical approaches as an implicit or explicit reaction to the theoretical issues

Whether describing the language of the crowd in protest events, measuring the ability of the crowd to empower its participants, or analysing the role of professional organizations involved in crowd safety and public order, the contributions in this volume are united in their commitment to a social scientific level of analysis. The crowd is often depicted as a source of irrationality and danger - in the form of riots and mass emergencies. By placing crowd events back in their social context - their ongoing historical and proximal relationships with other groups and social structures -

America's nearly decade-long vacation from insecurity, known as the "post-Cold War era." As eras go, this one was short and it certainly ended with a bang, not a whimper. The United States, still sole superpower, was now challenged by a bleak new world. Americans do not care for the bleak and do not tolerate it for long. Predictably, national shock soon became righteous anger, coupled to international campaigns against groups and states held responsible for the scourge of terrorism. These were short-term measures that hurt our enemies but did not "fix" the problem. Not long after these

Its purpose was to take a longer term view of the terrorism problem and what might be done about it--not only academic research but also policy suggestions. This book contains a broad selection of the Center's output, including essays on American strategy, homeland security, knowing the enemy, and the military dimension. A notable feature is the discussion of the educational issue: what and how to teach our children about terrorism.

In 2001 Jace Clayton was an unknown DJ who recorded a three-turntable, sixty-minute mix and put it online to share with friends. Within weeks, Gold Teeth Thief became an international calling card, whisking Clayton away to play a nightclub in Zagreb, a gallery in Osaka, a former brothel in Sao Paulo, and the American Museum of Natural History. Just as the music world made its fitful, uncertain transition from analog to digital, Clayton found himself on the front lines of creative upheavals of art production in the twenty-first century globalized world. Existing books on the analysis of popular music focus on theory and methodology, and normally discuss parts of songs briefly as examples. The impression often given is that songs are being chosen simply to illuminate

and exemplify a theoretical position. In this book the obverse is true: songs take centre stage and are given priority. The authors analyse and interpret them intensively from a variety of theoretical positions that illuminate the song. Thus, methods and theories have to prove their use value in the face of a heterogeneous, contemporary repertoire. The book brings together researchers from very different cultural backgrounds and encourages them to compare their different hearings and to discuss the ways in which they make sense of specific songs. All songs analysed are from the new

Therefore, it encompasses a broad palette, highlighting mainstream pop (Lady Gaga, Ke\$ha, Lucenzo, Amy McDonald), but also accounting for critically acclaimed 'indie' styles (Fleet Foxes, Death Cab for Cutie, PJ Harvey), R&B (Destiny's Child, Janelle Monae), popular hard rock (Kings of Leon, Rammstein), and current electronic music (Andrés, Björk).
