Tylor's rationale for classifying " magic " as a " survival " is an overall scheme of cultural evolution: " magic " , he claims, belongs " in its main principle to the lowest known stages of civilization " and while " progressive races have been learning to submit their opinions to closer and closer experimental tests, occult science has been breaking down into the condition of a survival " .

Through revisiting and challenging what we think we know about the work of Edward Burnett Tylor, a founding figure of anthropology, this volume explores new connections and insights that link Tylor and his work to present concerns in new and important ways. At the publication of *Primitive Culture* in 1871, Tylor was at the centre of anthropological research on religion and culture, but today Tylor's position in the anthropological canon is rarely acknowledged. *Edward Burnett Tylor, Religion and Culture* does not claim to present a definitive, new Tylor. The old Tylor - the founder of British anthropology; the definer of religion; the intellectualist; the evolutionist; the liberal; the utilitarian; the avatar of white, Protestant rationalism; the Tylor of the canon - remains. Part I explore debates and contexts of Tylor's lifetime, while the chapters in Part II explore a series of new Tylors, including Tylor the ethnographer and Tylor the Spiritualist, re-writing the legacy of the founder of anthropology in the process. *Edward Burnett Tylor, Religion and Culture* is essential reading for anyone interested in the

Totem and Taboo: Resemblances Between the Mental Lives of Savages and Neurotics is a book by Sigmund Freud in four parts: "The Horror of Incest", "Taboo and Emotional Ambivalence", "Animism, Magic and the Omnipotence of Thoughts" and "The Return of Totemism in Childhood". In these volumes, Freud applies psychoanalysis to the fields of archaeology, anthropology and the study of religion. *Totem and Taboo* has been seen as one of the classics of anthropology, considered by psychoanalysts and anthropologists as one of the great landmarks in the history of anthropology. Sigmund Freud (1856-1939) was an Austrian neurologist and the father of psychoanalysis, a clinical method for treating psychopathology through dialogue between a patient and a psychoanalyst. In creating psychoanalysis, Freud developed therapeutic techniques such as the use of free association and discovered transference, establishing its central role in the analytic process. Freud's redefinition of sexuality to include its infantile forms led him to formulate the Oedipus complex as the central tenet of psychoanalytical theory. His analysis of dreams as wish-fulfillments provided him with models for the clinical analysis of symptom formation and the mechanisms of repression as well as for elaboration of his theory of the unconscious.

How have human cultures engaged with and thought about animals, plants, rocks, clouds, and other elements in their natural surroundings? Do animals and other natural objects have a spirit or soul? What is their relationship to humans? In this new study, Graham Harvey explores current and past animistic beliefs and practices of Native Americans, Maori, Aboriginal Australians, and eco-pagans. He considers the

varieties of animism found in these cultures as well as their shared desire to live respectfully within larger natural communities. Drawing on his extensive casework, Harvey also considers the linguistic, performative, ecological, and activist implications of these different animisms.

《圖騰與禁忌》試圖透過一些保留在兒童時期的圖騰崇拜的遺跡，亦即通過我們的孩子在其成長過程中呈現出來的哪些細微跡象，來推導圖騰崇拜的原始意義。圖騰與禁忌之間的緊密關聯又使得我們向著《圖騰與禁忌》提出的假設向前邁進了一步；如果最終的論述使得這一假設看起來很難令人信服，那也沒有必要指責它在多大程度上有可能近似於現實，畢竟重建這種現實是如此的艱難。
