Foreword by Larry Rouch. Essay by Rodolphe el-Khoury. Interview by Michael Speaks. Introduction by Vito Acconci.

A major monograph of American architect Andrew Bromberg that explores how landscapes, both natural and human, inspire his designs

In recent years, the Dallas Museum of Art has expanded its collection of South Asian art from a small number of Indian temple sculptures to nearly 500 works, including Indian Hindu and Buddhist sculptures, Himalayan Buddhist bronze sculptures and ritual objects, artwork from Southeast Asia, and decorative arts from India's Mughal period. Artworks in the collection have origins from the former Ottoman empire to Java, and architectural pieces suggest the grandeur of buildings in the Indian tradition. This volume details the cultural and artistic significance of more than 140 featured works, which range from Tibetan thangkas and Indian miniature paintings to stone sculptures and bronzes. Relating these works to one another through interconnecting narratives and cross-references, scholars and curators provide a broad cultural history of the region.

Susan Sontag: An Annotated Bibliographycatalogues the works of one of America's most prolific and important 20th century authors. Known for her philosophical writings on American culture, topics left untouched by Sontag's writings are few and far between. This volume is an exhaustive collection that includes her novels, essays, reviews, films and interviews. Each entry is accompanied by an annotated bibliography.

Highlights the surprising ways in which the Nazi regime permitted or even fostered aspirations of privacy.

Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book-featuring a new afterword and an updated discography and bibliography-will long remain provocative and definitive.

Points of View in the Modern History of Psychology is a collection of papers that presents each individual contributor's expert knowledge of history in the field of psychology. One paper examines Wilhelm Wundt's concept of psychology as the propaedeutic science surviving and inspiring a generation or more of psychologists. Another paper discusses the early sources and the basic conceptions of functionalism as used in America. John B. Watson proclaims behaviorism as a new discipline in psychology with defining features, such as an objective, deterministic, scientific, and experimental method that can be used in both human and animal studies. Lieberman (1979), Mackenzie (1977) Miller, Galanter, and Pribram (1960) oppose behaviorism on the grounds that it slights the purpose of psychology, and focuses more on methodology to the detriment of theory. One paper notes that the acceptance or influence that a point of view has is based in some ways on the range and clarity of its connections with experimental and observational reality. This collection can prove useful for psychologists, behavioral scientists, psychiatrists, psycho-analysts, students of psychology, philosophy or general history who are interested in the many viewpoints of psychology.

We have still much to learn as to the laws according to which the mind and body act on one another, and according to which one mind acts on another; but it is certain that a great part of this mutual action can be reduced to general laws, and that the more we know of such laws the greater our power to benefit others will be.
