Projects include familiarization with colors, color and value balance, color as expression, color as impression, color squares, color as construction, warm-cold colors, and the interaction of colors. The course also examines the science of color; students study the physics, neuroscience, chemistry, and mathematics of color theory.

Demystifying its subject for professionals and students alike, this title inspires confidence in colour's application to graphic design, illustration, painting, textile art, and textile design.

Consisting of eight stencil-like disks that can be placed over Itten's color wheel to compare cool and warm values, complementary colors, and different hues and intensities, this useful and innovative tool helps designers explore a myriad

of harmonious color.

'History of Illustration' covers image-making and print history from around the world, spanning from the ancient to the modern. Hundreds of color images show illustrations within their social, cultural, and technical context, while they are ordered from the past to the present. Readers will be able to analyze images for their displayed techniques, cultural standards, and ideas to appreciate the art form. This essential guide is the first history of illustration written by an international team of illustration historians, practitioners, and educators.

Illustrates the principles of using color with numerous paintings and exercises designed to demonstrate how to use color to plan stronger designs, develop better compositions, and convey moods and emotions

Color Studies is a complete introduction to color theory and application for students in a broad range of design disciplines.
