If a student does not meet the minimum required score set by the state, it's an indication that the student needs more academic preparation. The high school is then required to provide postsecondary preparatory instruction. All students enrolled in public high school in the state of Florida are required to take the PERT in the eleventh grade. The PERT tests students' abilities in math, reading, and writing. The test directly tests for competence for intermediate algebra and freshman level composition. The PERT is not timed, and each section has thirty questions. Scoring The PERT is not a test to pass or fail; it's used to determine the best academic path toward college for students. It's important for students to take the PERT seriously (even though it isn't graded) to ensure they are placed in the most appropriate classes. The PERT is scored by section in a range of 50 - 150, with "cut scores" throughout (so students will get three different scores). There are three or four tiers (depending on the section) of cut scores to determine what level students are currently at.

If you have never failed your PT Test, then this little book is not for you. Sorry, save your money and go buy a Monster instead. If you have recently failed, concerned about an upcoming assessment, want to get leadership off your back, tired of bad advice that doesn't work from people who have never failed, never want your PT Test to interfere with your career ever again, just plain frustrated, or have troops that have failed, keep reading! I have gone from failing and being in "the program" to ending my career with a 97.5. My goal is to produce the same results for all the Airmen out there, who are struggling with the PT Test, themselves. This is not going to turn you into a machine overnight. This not my version of P90X. This is not Weight Watchers. I am not going to sell you a magic drink powder. I am not going to ask you to join a network marketing or multi level marketing scheme. What I am going to give you is information and guidance. The Air Force Physical Fitness Assessment is broken down to three parts. Strength, Aerobic Endurance, and Waist Measurement. In this book I will give you unconventional methods to address each of these. I will help you Pass Your PT Test by covering the following: *Strength (push-ups and sit-ups)- I can teach you how to improve these numbers drastically in 30 days by teaching you how to "grease the groove." *Aerobic Endurance (1.5 mile run)- This one isn't so easy. We will address ankle and foot mobility, running efficiency and training to specifically target your heart and lungs. *Body Composition (waist measurement)- This can be easy but in most cases we really need to spend some time on this. We will cover food addiction, inflammatory foods and stress management. Although I am retired, I still want to serve. The best way I see that's possible is to apply my years of research and experience to helping Airman never let the PT Test get in the way of a 5 EPR, promotion, or assignment ever again.

"This text covers a standard first course : Gauss's method, vector spaces, linear maps and matrices, determinants, and eigenvalues and eigenvectors. In addition, each chapter ends with some topics such as brief applications. What sets it apart is careful motivation, many examples, and extensive exercise sets. Together these help each student master the material of this course, and also help an instructor develop that student's level of mathematical maturity. This book has been available online for many years and is widely used, both in classrooms and for self-study. It is supported by worked answers for all exercises, beamer slides for classroom use, and a lab manual of computer work"--Page 4 of cover.
