**Building iPhone Apps
with HTML, CSS, and
JavaScript [Book]**
In our quest to build
an iPhone app

without Objective-C, we've so far learned how to use CSS to style a collection of HTML pages to look like an iPhone app. In this chapter, we'll lay the groundwork to make those same pages behave like an iPhone app. Specifically, we'll discuss using Ajax to turn a full website

into a single-page app, how ...

Building iPhone Apps with HTML, CSS, and JavaScript

Go to the Settings.app > Safari > Developer on your iPhone, then turn on the debug console. This will help you spot potential JavaScript errors. Once you've built

your app, you should turn this off so that you will get the full experience when testing your HTML5 iPhone app. About the App Icon and Startup Screen. The icon needs to be 57px x 57px.

I don't think facebook switched back, can't find anything like that on the web. And regarding the store app, that in no way seems to be build in HTML5, as you wont

get such a fast responsive app in HTML 5 (based on personal experience, I had build few apps and one game in HTML5, then switched to native and saw the C Or performance difference).
