ISO 2631=1:1997(E) @ ISO.

Introduction. The primary purpose of this part of ISO 2631 is to define methods of quantifying whole-body vibration in relation to human health and comfort; - the probability of vibration perception; - the incidence of motion sickness. This part of ISO 2631 is concerned with whole-body vibration and excludes hazardous effects of vibration transmitted directly to the limbs (e.g. by power tools).
