Cast Stone fabricated using the EMVDT
production system is made by vibratory
ramming earth moist, zero-slump concrete
against rigid formwork until it is densely
compacted and ready for immediate
removal from the form.; enabling as many
as 100 pieces to be cast from a single mold
in an eight-hour day thus it is ideally
suited to fast-track construction projects
due to its production capability.

One of the most important and difficult aspects of the gemstone casting process is removal of the investment. Flasks should never be quenched in water. Quenching causes sudden contraction of the stones and metal, which leads to shattering or cracking of gemstones. Once cast, flasks should be allowed to cool for two hours.

Cast in stone Synonyms | Collins English Thesaurus

Industry-wide, thin stone veneer is typically manufactured through a wet-cast process, for which a mold is created by spraying latex over the surface of pre-arranged natural stones. During the manufacturing process, the latex mold is placed in a metal pan and handpainted with colorant that will become the external colors of the manufactured stone units.
