## Restoration Of The Endodontically Treated

An endodontically treated tooth should have a good prognosis. It can resume full function and serve satisfactorily as an abutment for a fixed dental prosthesis (FDP) or a removable partial dental prosthesis. However, special techniques are needed to restore such a tooth.

## Restoration of endodontically treated teeth

The aim of this chapter is to offer a guide, from the endodontist's perspective, as to how root canal-treated teeth should be restored, and to give some clinical recommendations to help meet these restorative goals. The endodontic and restorative components of treatment are typically considered as independent phases.

---

## Endodontic Considerations for the Restoration of ...

The decision to dismantle and endodontically treat a tooth is difficult when a patient presents without symptoms and the tooth is heavily restored or restored with an extra-coronal restoration. The tooth may or may not be restorable and it may be difficult to assess without dismantling the restoration.

Restoration of Endodontically Treated Teeth Review and ...

Many dentists find it difficult to choose between different coronal restorations after root canal treatment (RCT). Studies show that the coronal restoration may affect the endodontic prognosis. This student-based study had three aims. (1) Examine the choice of coronal restoration of endodontically treated teeth at a Scandinavian dental school, (2) examine the survival of these restorations and (3) evaluate the influence of the coronal restoration on the outcome of the RCT.

Influence of the coronal restoration on the outcome of ...

Endodontically treated teeth (ETT) present with significantly different mechanical properties compared to vital teeth. 1,2 The modifications in the biomechanical properties and structural integrity of the teeth are most-likely attributed to the volumetric loss of the hard tissues, extent of carious lesion, fracture propagation, final cavity preparation in addition to the access cavity prior to endodontic therapy. 3,4,5,6,7

---

Current options concerning the endodontically-treated ...

The guidelines for restoration of the endodontically treated tooth evolve from this assessment. 1-7 The outcome of endodontic treatment has been documented in a number of studies. Typically, these studies are not accomplished with clinical evaluation but with radiographic evaluation only.
