Shortwave radio displays usually come in two types: digital and analog. I always recommend that newcomers purchase a radio with a digital display (and, preferably, with a keypad for direct frequency entry) if they don't already have a radio. That's the reason why you won't find an analog display on my recommended radios page.

Shortwave radio is an audio network that operates on frequencies in between the FM and AM bands. Its primary advantage is that data can be transferred throughout long distances and can reach the masses through one transmitter. Messages and sound are transmitted through electromagnetic waves that range from 10 to 80 meters long (33-262 feet).
