In 1921, Paul Amadeus Dienach, a Swiss-Austrian teacher with fragile health, falls into a one-year-long coma. During this time, his consciousness slides into the future and enters the body of another man in 3906 A.D. When Dienach awakens from his coma, he finds himself back in 1922. Knowing that he doesn't have much time left, he writes a diary, recording whatever he could remember from his amazing experience: the mankind's history in the forthcoming centuries, from the nightmare of overpopulation and World Wars up until the world-changing globalisation, the radical new administration system, the colony on Mars and the next human evolutionary stage. Without any close friends and relatives to entrust, he doesn't say a word to anyone out of fear of being branded a lunatic. Before he dies, he hands his diary to his favourite student, George Papachatzis, later prominent Professor of Law and Rector of Panteion University of Greece. The diary circulates as hidden knowledge amongst high ranking masons in the lodges of Athens. In 1972, professor Papachatzis, despite an intense dispute, decides to publish Dienach's diary in Greek. Paul Dienach was not an author, poet, or professional writer. Rather, he was an ordinary man who kept a journal, never with the expectation that it would be published. This unique and controversial book, a universal legacy, is now carefully edited, translated and available to everyone. This is the history of our future! We deliver it to you."

A Machine to Make a Future represents a remarkably original look at the present and possible future of biotechnology research in the wake of the mapping of the human genome. The central tenet of Celera Diagnostics--the California biotech company whose formative work during 2003 is the focus of the book--is that the emergent knowledge about the genome, with its profound implications for human health, can now be turned into a powerful diagnostic apparatus--one that will yield breakthrough diagnostic and therapeutic products (and, potentially, profit). Celera's efforts--assuming they succeed--may fundamentally reshape the fabric of how health and health care are understood, practiced, and managed. Presenting a series of interviews with all of the key players in Celera Diagnostics, Paul Rabinow and Talia Dan-Cohen open a fascinating window on the complexity of corporate scientific innovation. This marks a radical departure from other books on the biotech industry by chronicling the vicissitudes of a project during a finite time period, in the words of the actors themselves. Ultimately, the authors conclude, Celera Diagnostics is engaged in a future characterized not by geniuses and their celebrated discoveries but by a largely anonymous and widely distributed profusion of data and results--a "machine to make a future." In their new afterword,

Rabinow and Dan-Cohen revisit Celera Diagnostics as its mighty machine grinds along, wondering, along with the scientists, "what constitutes success and what constitutes failure?" The pathos of the situation turns on how one poses the question as much as how one answers it.

Zach was just your average, everyday, high school teenager. He had a group of friends, a girl friend, and common hobbies. He had every intention of staying average; but when a group of assassins kidnap him from the side of the street, staying average becomes nearly impossible. After waking up in a building with no windows and no way out, Zach learns he is not going to be staying average. The men who kidnapped him have their own future planned for him, a future that has to push him into training and physical activities his young body couldn't possibly handle. Their promise? Their promise is when he's finished his training he could be the best assassin to ever come out of their training. Their promise is, that in time, he'd have the power and skills needed to kill anyone and anything, including them.

Two best friends create a computer that can predict the future. But what they can't predict is how it will tear their friendship—and society—apart. “A fantastic page-turner and a future classic.”—Peter Clines, New York Times bestselling author of *Paradox Bound* IN DEVELOPMENT AS AN HBO MAX ORIGINAL SERIES If you had the chance to look one year into the future, would you? For Ben Boyce and Adhi Chaudry, the answer is unequivocally yes. And they're betting everything that you'll say yes, too. Welcome to *The Future*: a computer that connects to the internet one year from now, so you can see who you'll be dating, where you'll be working, even whether or not you'll be alive in the year to come. By forming a startup to deliver this revolutionary technology to the world, Ben and Adhi have made their wildest, most impossible dream a reality. Once Silicon Valley outsiders, they're now its hottest commodity. The device can predict everything perfectly—from stock market spikes and sports scores to political scandals and corporate takeovers—allowing them to chase down success and fame while staying one step ahead of the competition. But the future their device foretells is not the bright one they imagined. Ambition. Greed. Jealousy. And, perhaps, an apocalypse. The question is . . . can they stop it? Told through emails, texts, transcripts, and blog posts, this bleeding-edge tech thriller chronicles the costs of innovation and asks how far you'd go to protect the ones you love—even from themselves.

The "Future Chronicles" has grown, from a single collection of robot stories, into a series whose unique take on major science fiction and fantasy themes - A.I., aliens, time travel, dragons, telepaths, zombies, immortality, galactic battles, cyborgs, doomsday - has made it one of the most acclaimed short story anthology series of the digital era. Its companion series - "Alt.Chronicles, The Illustrated Chronicles" and "Chronicle Worlds" - are similarly ground-breaking in their coverage of less mainstream tropes such as alternative history and shared universes. Created by award-winning author Samuel Peralta, and edited by some of the most-respected editors in the genre, each volume brings together work from visionary new voices and from the grandmasters of modern science fiction and fantasy. This "Future Chronicles - Special Edition" volume is a compendium of stories selected from the Chronicles' standalone titles, and includes five new stories, never before published, from some of today's best writers in speculative fiction.

Richard Green wakes in the distant future; the cryogenic suspension he and his wife Helen opted for seems to have worked. He finds his body rejuvenated, his mind augmented, and a society that seems to be utopian. Everything seems perfect, except one thing - he can't find Helen. His attempts to find her, among the rest of what have become known as Cryogens, are being deliberately frustrated. Worse still, he uncovers evidence of a plot to destroy all Cryogens. After encountering a group of protesters it becomes obvious that the only chance of finding what's happened to her is to help them, and that's when he finds himself at the centre of a

struggle that spans more than one Earth and threatens his very existence. But if putting his life on the line is the only way he can find out what's happened to Helen, that's what he's prepared to do. In a world full of immortals, someone has to die
