The Consequence of Rejection finally gives readers the story of the most unlucky man in the world! Can Jason finally face the girl that broke his heart? With Max's help, will he survive?

Interpersonal rejection ranks among the most potent and distressing events that people experience. Romantic rejection, ostracism, stigmatization, job termination, and other kinds of rejections have the power to compromise the quality of people's lives. As a result, people are highly motivated to avoid social rejection, and, indeed, much of human behavior appears to be designed to avoid such experiences. Yet, despite the widespread effects of real, anticipated, and even imagined rejections, psychologists have devoted only passing attention to the topic, and the research on rejection has been scattered throughout a number of psychological subspecialties (e.g., social, clinical, developmental, personality). In the past few years, however, we have seen a surge of interest in the effects of interpersonal rejection on behavior and emotion. The goal of this book is to pull together the contributions of several scholars whose work is on the cutting edge of rejection research, providing a scholarly yet readable overview of recent advances in the area. In doing so, it not only provides a look at the current state of the area but also helps to establish the topic of rejection as an identifiable area for future research. Topics covered in the book include: ostracism, unrequited love, betrayal, stigmatization, rejection sensitivity, rejection and self-esteem, peer rejection in childhood, emotional responses to rejection, and personality moderators of reactions to rejection.

Both children and adults who experience chronic peer victimization are at considerable risk for a host of adverse psychological consequences, including depression, aggression, even suicidal ideation. *Bullying, Rejection, and Peer Victimization* is the only book that addresses bullying across the developmental spectrum, covering child, adolescent, and adult populations. The contributors offer in-depth analyses on traditional aggression and victimization (physical bullying) as well as social rejection (emotional bullying). Peer and family relationships, relational aggression, and cyber-bullying are just a few of the important topics discussed. Key Features: Analyzes both perpetrator's and victim's sides of the peer victimization experience Explores how gender traits influence aggression Investigates how family dynamics influence chronic peer victimization Examines the relationships between social status, power, and aggression This text offers a wealth of insight into the experiences of victims of peer bullying, using cutting-edge theoretical perspectives, including social cognition, social ecology, genetics and genetic-environment interactions, and social cognitive neuroscience.

The second edition of the first and only concise introduction to American business insolvency law, this volume provides a succinct overview of American business bankruptcy as it is actually practiced, integrating the law as written and implemented, and now includes coverage of the Small Business Reorganization Act.

This book looks at suicide in a cross-cultural context showing how it is differently understood in different ethnic groups, reflecting various degrees of stigma. It argues for greater recognition of these key differences between cultures and ethnic groups, and shows how important they can be to our understanding and intervention, as well as considering the practical and moral issues raised by euthanasia.

This important collection brings together current research on children who encounter difficulty in gaining acceptance and having friendships among their peers. The volume's contributors, development and clinical psychologists who have been involved in research in this area for over a decade, seek to advance the study of peer rejection by giving careful attention to the psychological processes that create and maintain peer rejection in childhood. Topics addressed include how certain children come to be disliked by their peers; the factors that maintain their rejection; the consequences of poor peer relations; and the results of intervention with various subgroups of rejected children. The volume describes the many advances that have been made in the study of peer rejection, and provides organizing models that point to avenues for future inquiry.
