The Russian oven or Russian stove is a unique type of oven/furnace that first appeared in the early 15th century. The Russian oven is usually placed in the centre of the izba, a traditional Russian dwelling, and plays an immense role in the traditional Russian culture and way of life. It is used both for cooking and domestic heating and is designed to retain heat for long periods of time.

*Timeline of Russian innovation - Wikipedia*

The Invention of Russia is a clear explanation of the fall of the Soviet Union and the rise of Putin. It shows the extent to which reality is constructed by shared language and context, and how that context can be guided by those in control of the media. Excellent and a useful tool for framing the current American media environment.

## Principles

The last invention which actually originated in Russia is a helicopter. In 1910, Igor Sikorsky created the prototype of a rotor-driven device, which successfully fly above the ground for a little bit, and many years followed improving this invention further. However, after the 1917 Revolution in Russia, he had to move to the US. Back there, we created this own personal company called Sikorsky Aero Engineering Company.
