Self-Care and Recovery After Trauma - WebMD

Trauma recovery tip 1: Get moving. Trauma disrupts your body's natural equilibrium, freezing you in a state of hyperarousal and fear. As well as burning off adrenaline and releasing endorphins, exercise and movement can actually help repair your nervous system. Try to exercise for 30 minutes or more on most days.

Emotional and Psychological Trauma - HelpGuide.org

The guiding principles of trauma recovery are the restoration of safety and empowerment. Recovery does not necessarily mean complete freedom from post traumatic affects but generally it is the ability to live in the present without being overwhelmed by the thoughts and feelings of the past.
